CAREER OBJECTIVE

IT Professional, Cybersecurity Analyst, and Web Developer with hands-on experience in frontend development, AI automation, and security operations. Skilled in building responsive web applications using React, TailwindCSS, Vite, Python, and Django, as well as integrating REST APIs and AI-powered workflows. Experienced in alert triage, incident investigation, phishing analysis, and security monitoring using Wazuh, Microsoft Defender XDR, Qualys VMDR, and threat intelligence platforms. Hands-on experience deploying and integrating open-source AI agent platforms such as OpenClaw and Hermes Agent to automate workflows and connect AI capabilities with tools including Telegram, Slack, Jira, and infrastructure management systems. Currently expanding expertise in AI agents, prompt engineering, Retrieval-Augmented Generation (RAG), and workflow orchestration. Passionate about developing AI-enabled applications and automation solutions that improve operational efficiency.

TECHNICAL SKILLS

- **Languages & Frameworks:** JavaScript (ES6+), Python, PHP, React.js, Django, HTML5, CSS3, Tailwind CSS, DaisyUI
- **Databases & APIs:** MySQL, PostgreSQL, RESTful APIs, API Integration
- **AI & Automation:** Prompt Engineering, LLM Integration, AI Agent Integration, AI Workflow Automation, AI-Assisted Automation
- **Cybersecurity:** Security Alert Monitoring, Incident Triage, Vulnerability Management, Threat Intelligence, OSINT, Wazuh, Microsoft Defender XDR, Qualys VMDR
- **Enterprise IT:** Microsoft Entra ID, Microsoft Intune, Exchange, SharePoint, Datto RMM, Proxmox Virtualization
- **Tools & Platforms:** Git, GitHub, VS Code, Vite, Ubuntu Linux, Windows Administration

PROFESSIONAL EXPERIENCE

SOC Analyst L1 / Cybersecurity Analyst
Aetas Security

November 2025 - Present

- Monitor and triage security alerts across enterprise client environments to identify potential threats and suspicious activity.
- Investigate and analyze security incidents using Wazuh, Microsoft Defender XDR, and Qualys VMDR; escalate critical events as needed.
- Support IT operations through user provisioning, account administration, and device management via Microsoft Intune and Microsoft Entra ID.
- Maintain system visibility and operational support using Datto RMM and assist with virtual machine deployment and administration.
- Conduct OSINT-based threat intelligence research to support incident investigation and triage decisions.

Freelance Web Developer | Self-Employed

2024 – Present

- Build full-stack web applications, frontend apps, portfolios, dashboards, and landing pages for client commissions
- Improve existing projects by fixing bugs, resolving errors, refining UI, and adding requested features
- Prepare projects for production by testing, configuring hosting, and deploying sites online

Freelance IT Technician

2022 – 2024

TESDA NC II – Computer System Servicing Certified

- Install, configure, and troubleshoot Windows and Ubuntu Linux operating systems for personal and small business clients.
- Deploy and troubleshoot LAN and internet connectivity, diagnose hardware/software issues, and perform system maintenance.
- Provide PC assembly, system deployment, and technical support services.

KEY PROJECTS

AI Workflow Automation and Agent Integration

2026 – Present

- Deployed, configured, and customized open-source AI agent platforms including **Openclaw** and **Hermes Agent** to support workflow automation and operational tasks.
- Integrated AI agents with Telegram, Slack, Jira, and other productivity tools, enabling conversational access to information, automation workflows, and operational support.
- Implemented AI-assisted workflows for infrastructure monitoring, knowledge retrieval, task automation, and productivity enhancement.

CyberGuide AI — Internal Cybersecurity Assistant

2026

- Built an LLM-powered internal cybersecurity assistant web app using Django, Tailwind CSS, and the Groq API.
- Implemented user authentication, multi-conversation history, and a detailed system prompt covering internal SOC workflows.

GitCraft — Interactive Git & Github Sandbox Simulator

2026

- Developed an interactive version control sandbox platform designed to visually teach Git and GitHub concepts.
- Programmed a visual workspace tracking files across stage states (untracked, staged, committed), a live commit graph nodes tree, and an in-browser terminal command parser.
- Built using React, Vite, and Tailwind CSS.

One Zamboanga: Evacuation Center Management System — Lead Developer

2025

- Developed a responsive system for tracking evacuees and monitoring supply distribution across evacuation centers.
- Integrated Chart.js dashboards for real-time data visualization and analytics.
- Presented at the College of Computing Studies Research Forum 2025.

WESMAARRDEC Event Management System — *Lead Developer*

2024

- Built event tracking and management interfaces with interactive data visualization and reporting features.
- Implemented data export and print-ready outputs to improve operational reporting.

EDUCATION

- **BACHELOR OF SCIENCE IN INFORMATION TECHNOLOGY**
Western Mindanao State University
Normal Road, Baliwasan, Zamboanga City
2021-2025
